Are you an office space owner?

Are you planning to rent out an office, or already doing this?

We'll help your business to grow up and provide unique opportunities for tenancy sphere.

[Try it right now!](#)

It's never been easier!

- 1 A list of your visitors is always at hand, every one you know in person. With any of them you can contact if he published contacts.
- 2 Keep single schedule that is automatically updated whenever seats are booked. You can even add back the visitors not yet familiar with JUWOTO!
- 3 Track statistics and reports on visitors and finances in real-time.
- 4 Add your employees and customize their access to functionality.
- 5 App for iOS and Android will help you stay in the loop even if the computer is far away.

Meet JuPass – access control system, developed by the JUWOTO team to make managing coworking space easier for you.

JuPass

Each JUWOTO user who booked and paid a visit to your coworking or purchased a ticket to the event gets a unique QR code. Your administrator can scan the code with a mobile app JUWOTO in which, in addition to the reservation status and ability to register a visitor, you will see information published in profile.

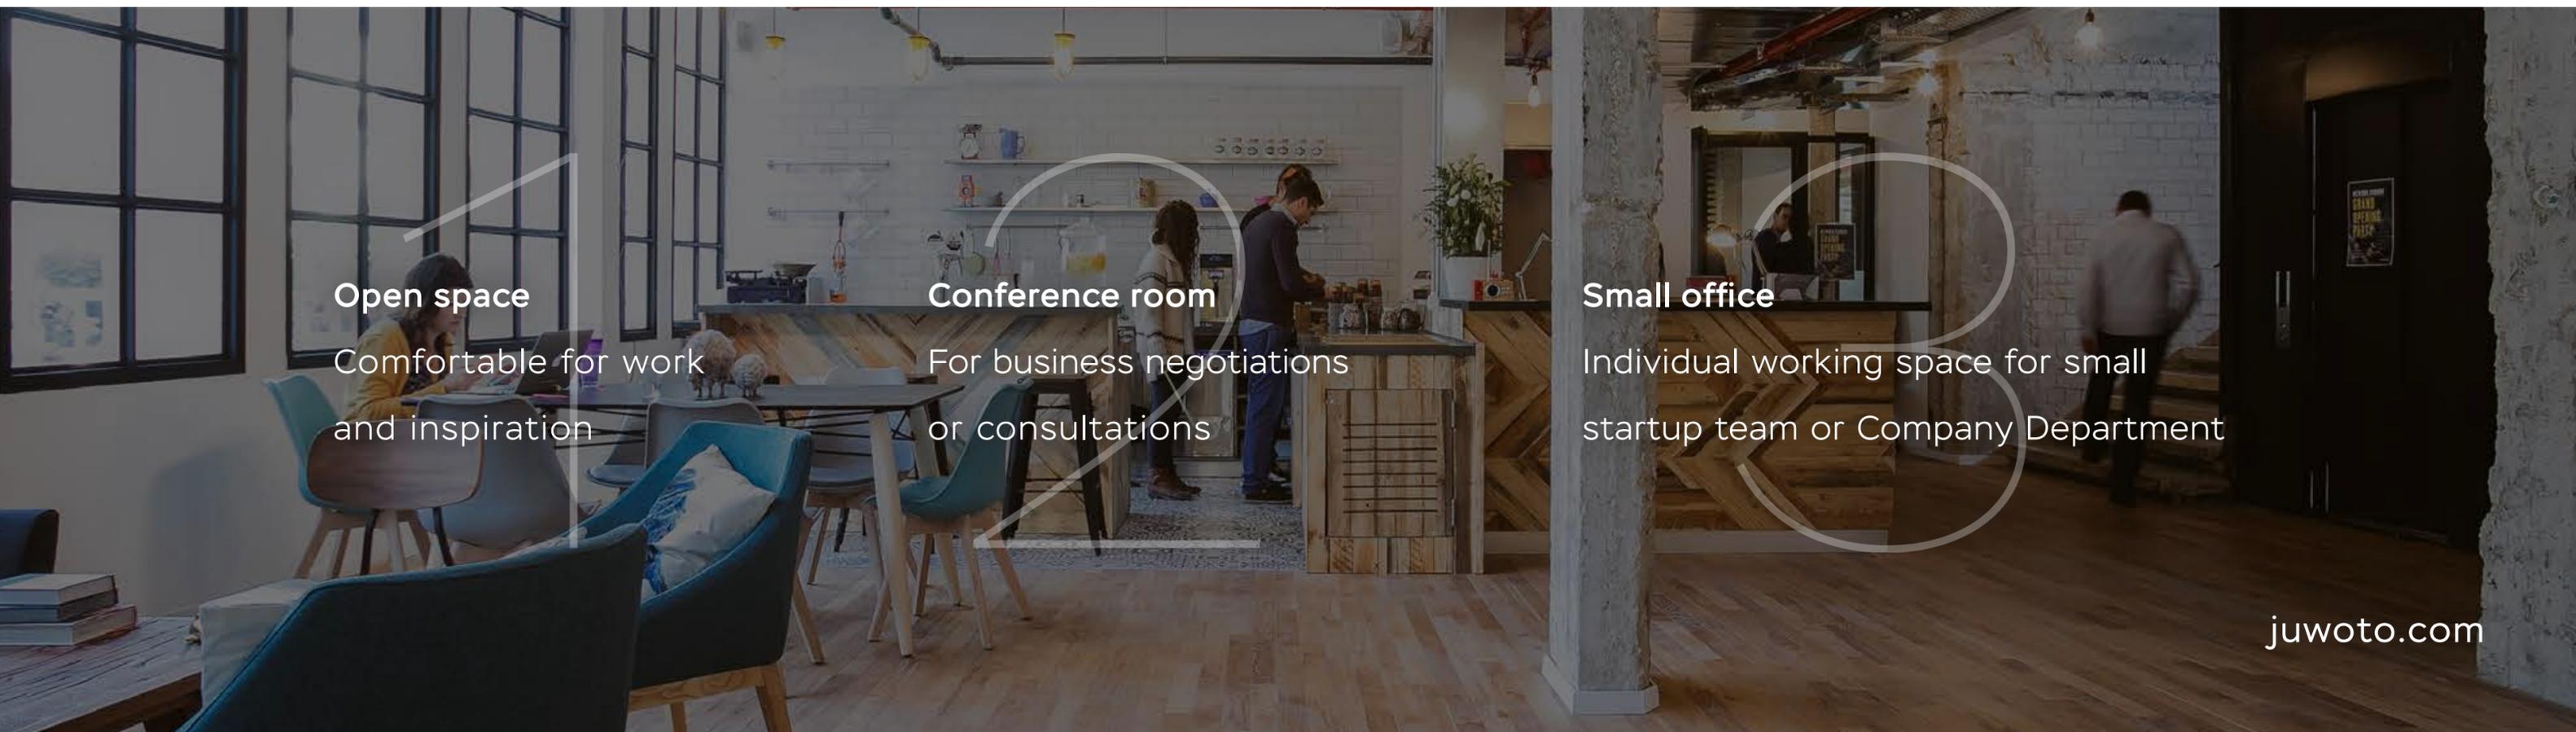

Install stylish JuPass device that automatically reads the QR code and updates the schedule of your coworking on JUWOTO, and when connected to the turnstile or the electronic lock - allows you to go through. It doesn't require the presence of an administrator to check the booking status and to admit the visitor. In addition, you can see what time your employees come and go!

Flexible offers configuration

Choose the types of offers.

Create hourly, night or around the clock. Flexible cost calculation.

Set working time easily.

Open space

Comfortable for work
and inspiration

Conference room

For business negotiations

startup team or Company Department

Your coworking space so easy to find!

Take visitors from around the world

JUWOTO users, whether they are from your city or on business trip, undoubtedly will find your coworking space using understandable search.

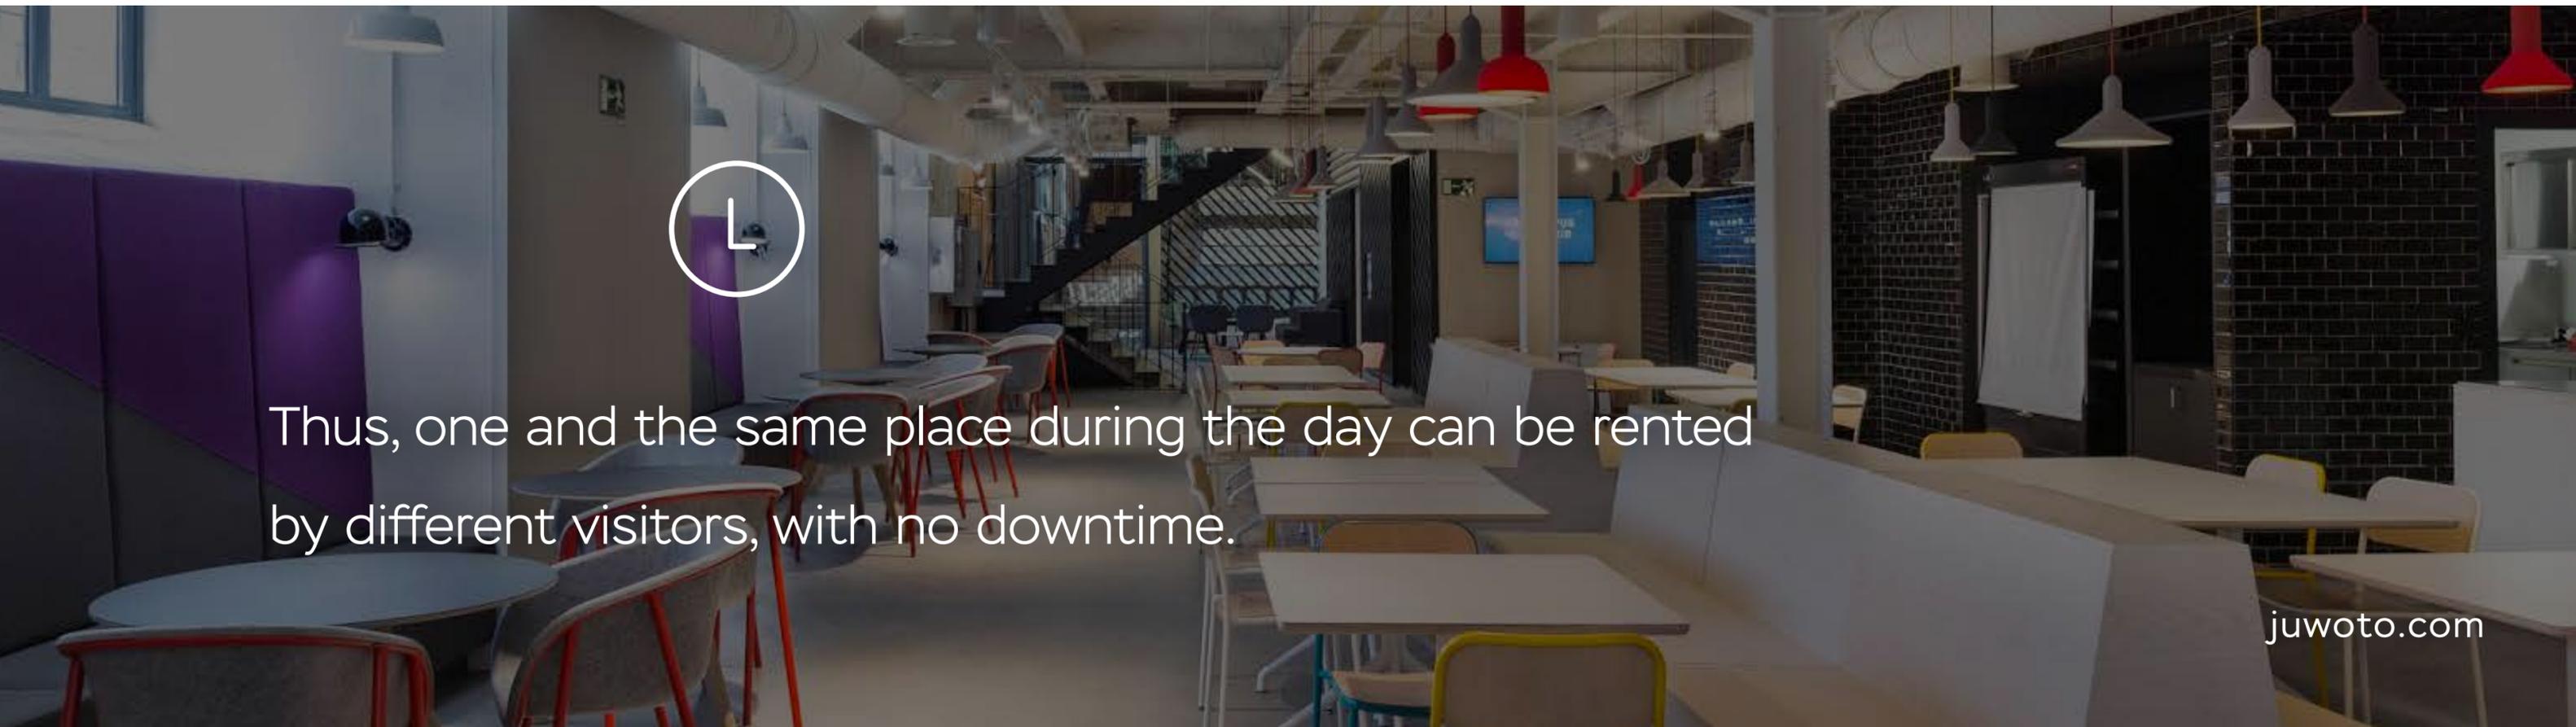

Collaborate with the community

Tell us about your coworking space in the description, keep a blog, arrange events and share news on social media.

We will handle your promotion

JUWOTO membership

The vast majority of coworking spaces rent out workplaces in open space at least a day. Our users, who become JUWOTO members have the opportunity to book a place in coworking-partner just for the hours they plan to spend there.

Thus, one and the same place during the day can be rented by different visitors, with no downtime.

JuWiFi

The system JuWiFi, which we've developed from scratch, will allow you to make a wireless network in your coworking space only available to visitors and staff, and to regulate minimum and maximum speed of Internet access for each zone separately.

JuWiFi

Forget about expensive equipment.

All you need is a regular router that is compatible with our system.

Our experts recommend purchase the following models, depending on your needs:

MikroTik RB951 – up to 50 sessions

MikroTik RB2011 – up to 100 sessions

MikroTik CRS125 – up to 300 sessions

Configure your router using the instructions in your account on [Juwoto.com](https://juwoto.com) and control Internet access even easier with JuWiFi!

Try it right now!

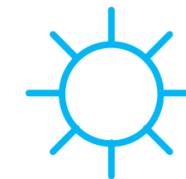

Sign up

You will need just a couple of clicks to become a part of JUWOTO.
